

Global Innovation Index 2023

The Global Innovation Index (GII) **ranks world economies according to their innovation capabilities.**

Consisting of **roughly 80 indicators**, grouped into innovation inputs and outputs, the GII **aims to capture the multi-dimensional facets of innovation.**

Austria ranking in the Global Innovation Index 2023

> Austria ranks **18th** among the 132 economies featured in the GII 2023.

> Austria ranks **17th** among the 50 high-income group economies.

> Austria ranks **10th** among the 39 economies in Europe.

> Austria GII Ranking (2020-2023)

The table shows the rankings of Austria over the past four years. Data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of Austria in the GII 2023 is between ranks 14 and 18.

	GII Position	Innovation Inputs	Innovation Outputs
2020	19th	18th	23rd
2021	18th	16th	24th
2022	17th	17th	21st
2023	18th	18th	15th

Austria performs better in innovation outputs than innovation inputs in 2023.

This year Austria ranks **18th in innovation inputs**. This position is lower than last year.

Austria ranks **15th in innovation outputs**. This position is higher than last year.

Global Innovation Index 2023

→ Expected vs. observed innovation performance

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

> Austria is an innovation leader, ranking in the top 25 of the GII.

> Innovation overperformers relative to their economic development

↑ GII Score

- Innovation leader
- Performing above expectations for level of development
- Performing at expectations for level of development
- Performing below expectations for level of development

→ Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

> Austria produces more innovation outputs relative to its level of innovation investments.

→ Overview of Austria's rankings in the seven areas of the GII in 2023

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for Austria are those that rank above the GII (shown in blue) and the weakest are those that rank below.

> Highest rankings

Austria ranks highest in Human capital and research (11th), Infrastructure (12th), Institutions, Creative outputs (13th) and Knowledge and technology outputs (17th).

> Lowest rankings

Austria ranks lowest in Market sophistication (39th), Business sophistication (19th) and Knowledge and technology outputs (17th).

→ Benchmark of Austria against other country groupings for each of the seven areas of the GII Index

The charts show the relative position of Austria (blue bar) against other country groupings (grey bars), for each of the seven areas of the GII Index.

> High-Income economies

Austria performs above the high-income group average in Knowledge and technology outputs, Creative outputs, Business sophistication, Human capital and research, Infrastructure, Institutions.

> Europe

Austria performs above the regional average in all the pillars.

Global Innovation Index 2023

→ About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a “tool for action” for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
